PROFESSIONAL SUMMARY

A Cybersecurity Intelligence Analyst turned aspiring Product Manager with 3 years of experience, I bring risk-aware thinking, structured problem-solving, and a builder's curiosity for AI to product teams.

PROFESSIONAL EXPERIENCE

Cybersecurity Intelligence Analyst — On-Demand Research – ZeroFox

Jan 2025 – Aug 2025 | Bengaluru

- **Product discovery in practice:** Scoped and fulfilled 50+ on-demand intelligence briefs — defining scope from ambiguous client requests and delivering structured findings that drove security decisions, mirroring the PM discovery and requirements cycle.
- **Stakeholder communication:** Authored customer-facing threat alerts, intelligence reports, and executive summaries, translating complex technical findings into actionable insights for both technical teams and C-suite stakeholders.
- **Risk-based prioritisation:** Applied severity-scoring frameworks to triage high-volume threat signals under tight SLAs — a direct analogue to product backlog prioritisation using impact/effort matrices.
- **Recognition:** Received ZeroFox Excellence Award (Pinnacle Award) for mitigating a critical malicious activity, demonstrating analytical rigour and decisive action under pressure.

Platform Specialist — SOC Analyst – ZeroFox

Aug 2023 – Dec 2024 | Bengaluru

- **Platform depth:** Operated in a 24x7 SOC environment, fulfilling high-volume information requests and continuously prioritising severe threats across the ZeroFox HNTR platform — building comprehensive product fluency across all major solution areas.
- **Process discipline:** Followed and refined SOPs to analyse, escalate, and remediate critical incidents; conducted phishing analysis, email header investigation, malware and URL analysis, and domain threat monitoring.
- **Customer-facing communication:** Responded to client enquiries with timely status updates, building habits of stakeholder management and expectation-setting that directly transfer to PM execution.

PRODUCT CASE STUDIES

Tripadvisor: QReview (Scan and Review)

- **One-line description:** A feature that allows travelers to scan QR codes at venues to immediately give structured ratings and quick reviews in exchange for redeemable “TACoins,” simplifying the review process and boosting platform engagement.
- **Your role:** Product Manager (Growth & Engagement).

- **Tools used:** Similarweb (for traffic analytics and secondary research) and UI/UX wireframing tools.
- **Outcome/result:** Reduced user friction and descriptive drop-offs, increased platform ad impressions/traffic, boosted secondary travel bookings via TACoins, with success measured by the North Star Metric: Number of reviews posted per month.

Cult : Nutrition

- **One-line description:** A personalized nutrition profiling and meal-planning subscription feature designed to build a holistic health ecosystem and drive cross-selling revenue through Eat.fit pre-orders.
- **Your role:** Product Manager (Growth Team).
- **Tools used:** Figma (for high-level user journey mapping and interactive wireframing).
- **Outcome/result:** Created a brand new subscription model targeting user retention and trial conversions, driving down acquisition costs by scaling Eat.fit cross-orders, tracked by the North Star Metric: Revenue generated by pre-orders from the Nutrition vertical.

Swiggy HomeYum

- **One-line description:** A hyperlocal marketplace platform within the Swiggy app connecting users with verified home-chefs for healthy, subscription-based native cuisine deliveries.
- **Your role:** Product Manager (New Product Vertical / Expansion).
- **Tools used:** Prototyping software (User & Home-chef App Prototypes) and System Architecture/Design tools.
- **Outcome/result:** Enabled a projected annual revenue potential of ₹1,080 Cr (~\$130M) for Swiggy, empowered local home-chefs to earn an average of ~₹25,200/month, and captured a new health-conscious user base, evaluated by the North Star Metric: Number of successful subscription meals delivered per week.

SKILLS

Product Strategy & Discovery: Product Roadmap, OKRs, Wireframing, Product design, UI/UX principles, Prototyping, Design thinking, PRDs, User stories, Stakeholder management, Product lifecycle management, First-principles thinking, User research, Problem framing, JTBD

Execution & Delivery: Agile / Scrum, Sprint planning, Backlog refinement, Release planning, Cross-functional leadership

Data & Analytics: A/B testing, Funnel metrics, Google Analytics, SQL, Experimentation & hypothesis validation, Data storytelling

Tech & AI: APIs, System integrations, GenAI, LLMs (RAG, Prompt Engineering, Vibe coding)

Tools: Figma, Jira, Confluence, Power BI, Excel

CERTIFICATIONS & AWARDS

AI Product Management Certification – Airtribe | 2025

Pinnacle Award (Excellence Award) – ZeroFox | Awarded for mitigating a critical malicious activity

EDUCATION

B.E. Computer Science & Engineering – Tontadarya College of Engineering | 2019 – 2023
